

OCTOBER 2026

GPAEE NEWSLETTER

*Fostering action through education, innovation, and networking to promote
the priorities of Philadelphia area energy professionals*

THIS ISSUE'S FEATURED ARTICLES:

- Upcoming Events
- September Monthly Event
- AEE World 2026
- Career Discovery Network
- Short-term Energy Outlook
- Future City Competition
- Doc Bakey Insights
- Energy Job Board
- New Member Spotlight

We are dedicated to helping our members and community implement energy efficient technologies to reduce expenses, improve the environment, and bolster our economy.

We invite you to join our local chapter to network with your industry peers, discuss projects, develop leads, encourage energy efficient design and discover new energy related strategies. Our chapter meets once a month from September through June. We have a variety of monthly meetings with guest speakers, tours, and great opportunities for networking.

We are proud to say our membership is well over 300 members and growing with a network of over 1200 individuals in the Greater Philadelphia area.

If you are an Energy Professional, an end user, in Government, a student, or just about anyone in the business world, you will benefit from being a part of our organization.

Come out and find out for yourself.

GPAEE is a local chapter of the Association of Energy Engineers (noted as "National"). We have our own by-laws, board of directors, and finances. We ask a nominal amount to be a GPAEE member of which we utilize those funds to help provide our programs. We work in concert with National AEE to coordinate regional activities, report critical information for their fiscal and information purposes, and assist each other as needed. We encourage all GPAEE members to consider National AEE and visa versa.

GPAEE Monthly Event

September 23, 2026

September's GPAEE Event was held at the Estes Express Lines Norristown Center, which is a strategic regional shipping hub serving the greater Philadelphia metropolitan area. Handling freight shipping, less-than-truckload (LTL) logistics, and regional cargo distribution. This terminal is also the site of a rooftop solar array that is part Estes' transition toward greener infrastructure.

Jeff Nocella, a commercial solar development specialist at Bala Energy, guided the project from its initial design and engineering to construction and final commissioning. Jeff presented attendees with an overview of what it takes to bring an on-site solar project to life, as well as answering any questions that came up along the way.

Many thanks to Jeff Nocella from Bala Energy for sharing his time and expertise, as well as Estes Express Lines for allowing us the opportunity to see their impressive installation!

AEE World 2026

Orlando, Florida
September 16-18, 2026

This year's AEE World Energy Conference & Expo brought together more than 2,000 energy professionals, 100 exhibitors, and leaders from over 60 countries at the Orange County Convention Center in Orlando, Florida.

Featuring inspiring keynotes and presentations by luminaries such as Duncan Wardle, former Head of Innovation at Disney; Erin Brockovich, renowned consumer advocate and environmental activist; and Trent Gillespie, former senior technology expert at Amazon, and founder and CEO of Stellis AI; the powerful lineup spanned public advocacy, technology, and global enterprise.

In addition, there were 11 specialized technical tracks and over 140 presentation sessions focused on Decarbonization and Grid Resilience, AI & Data Driven Management, and Industrial and Building Performance.

Board members Matt Ogden, Monica Bersani, and Alex Grella.

GPAEE Board Member and Past President, Monica Bersani, accepted the award on behalf of GPAEE.

During Tuesday's Chapter Meeting and Awards Luncheon, the Greater Philadelphia Chapter of the Association of Energy Engineers (GPAEE) was recognized by AEE, winning the 2026 National Award for Best Sustainability Program. This for our 2026 Philadelphia Energy Update.

Next year mark's the 50th Anniversary of the Association of Energy Engineers. Be sure to mark your calendars for the celebration which will be at AEE World in Atlanta, Georgia on September 22-24, 2027!

UPCOMING ENERGY EVENTS, WEBINARS & PODCASTS:

Help Career Discovery Network by participating in their STEM Job Shadow Experience!

The Career Discovery Network is looking for employers to host a 2-day career exploration experience for their students. Ideal employers would:

- Have a technical background (i.e. engineering, transportation/automotive, electrical, agricultural)
- Provide an overview of their industry, as well as an interactive activity, and career conversations/mentorship
- Have the ability to host a group of 5-10 students for 3-5 hours/day

If you are interested in hosting a STEM Job Shadow Experience, please reach out to Contact@Careerdiscoverynetwork.org

PROGRAMS AND SERVICES

• CAREER DISCOVERY

Collaborating with employer mentors to guide youth on different career paths and help them identify the required skills for success in various industries

• ENTREPRENEURSHIP AND FINANCIAL LITERACY

Empowering youth with financial literacy and entrepreneurship to build sustainable community wealth and economic resilience

• ADULT STEM AND JOB PLACEMENT

Learn skills for job placement in fast-growing telecom and hardware engineering fields, driving innovation and opportunities.

• YOUTH MENTAL HEALTH SUPPORT

Having a healthy mind and spirit is essential for learning and achieving your goals. With the help of our wellness partners, DEI offers counseling resources that can help foster emotional strength, which is crucial for successful personal development.

Preparing Our Next Generation of Leaders! .

The **Career Discovery Network** is dedicated to fostering workplace success by building robust career pathways, promoting inclusivity, and supporting sustainable practices to empower young individuals for a brighter future. Our primary goal is to create a fair all-inclusive environment for everyone, with a special emphasis on helping youth strive to reach their highest potential as they enter the workforce. Our Greatest partners are employers, empowering **Career Discovery Network** to provide:

- **Educational Workshops:** Providing training and resources on Workplace Equality topics to raise awareness and foster understanding among young professionals and employers.
- **Mentorship Programs:** Connecting youth with mentors who can guide them in navigating workplace challenges
- **Advocacy:** Working with organizations to develop and implement equitable practices and reduce systemic inequities, promoting [Retention, Career Advancement, and Sustainability](#)
- **Support Networks:** Establishing support groups for youth to share experiences and strategies for overcoming workplace bias.
- **Research and Reporting:** Conducting research to identify areas of inequity and track progress in creating more inclusive workplaces.

short term energy outlook

Forecast overview

(10/6/2026)

Overview

- **Winter Fuels Outlook.** We published the 2026-27 edition of the Winter Fuels Outlook in conjunction with this month's Short-Term Energy Outlook (STEO). Nationally, we expect homes that use natural gas and propane as their main source of space heating – collectively around half of U.S. households – will spend less on average on those fuels than last winter. We forecast homes that use electricity as the main heating source will spend slightly more this winter. Fuel spending is set to rise the most for homes that primarily use heating oil, which make up about 3% of U.S. households and are located mostly in the Northeast part of the country. These homes face heating oil prices that are up more than 30% from last winter, although we expect heating oil expenditures to increase by 21%, offset by a milder winter this year in the Northeast. On average across the United States, our forecast assumes temperatures this winter will be about the same as last winter and the previous 10-winter average.
- **Global oil market assumptions.** Although we assume that oil flows from the Middle East will remain constrained through the fourth quarter of 2026 (4Q26), we estimate that regional shut-in production in September was the lowest since the onset of hostilities. Despite ongoing constraints, we assume that a combination of convoys through the Strait of Hormuz and workarounds to oil exports from the Middle East, including bypass routes and increased use of ship-to-ship transfers, will lead to production and exports from the region generally increasing through the forecast period.
- **Global oil prices.** Although we expect oil production and flows from the Middle East will increase, we raised our global oil price forecast compared with last month. We now forecast the Brent crude oil spot price will average \$105 per barrel (b) in 4Q26, \$14/b higher than in last month's STEO. The attacks on the East-West pipeline in Saudi Arabia highlight the potential for continued volatility in physical oil flows and oil prices amid ongoing withdrawals of oil inventories globally. Additional upward pressure on crude oil prices stems from extreme tightness in diesel markets that raises demand for crude oil in order for refiners to meet diesel demand. We expect the Brent spot price will fall to an average of \$84/b next year.
- **Petroleum prices.** U.S. retail gasoline and diesel prices rose sharply in September; gasoline prices averaged \$4.35 per gallon (gal), and diesel prices averaged \$6.29/gal, driven by higher crude oil prices and rising crack spreads. We expect retail diesel prices to average about \$4.50/gal next year and for gasoline prices to average just under \$3.60/gal.
- **Distillate inventories.** East Coast distillate fuel inventories fell 32% below their five-year seasonal average in September. Although we expect inventories to recover, they remain around 20% below the 2021-2025 average through the upcoming winter in our forecast. We expect ongoing global supply constraints will keep inventories below normal through the forecast period. We expect East Coast distillate inventories will gradually increase as the tightness in global fuel markets eases, bringing inventories in the region close to their five-year average during the second half of next year.
- **Natural gas prices.** We forecast the Henry Hub spot price for natural gas to average \$3.16 per million British thermal units (MMBtu) in 2027, a 9% decrease from 2026. The decrease reflects ongoing higher-than-average natural gas inventories in our forecast, driven by production increases that offset rising liquefied natural gas exports.
- **Wholesale electricity prices.** Wholesale electricity prices in the United States average \$52 per megawatt hour in 2026 in our forecast, 11% more than in 2025 primarily due to extreme weather events such as winter storm Fern and higher-than-average summer temperatures. Although prices across most hubs have remained relatively stable in 2026, wholesale prices in the PJM region are set to increase by 41% while prices in the Northwest Mid-Columbia region are expected to fall by 23%.
- **Forecast timeline.** We finalized inputs into the model on October 1, 2026. This month's forecast does not specifically account for market events after that day. Accordingly, this outlook includes exchanges for 40 million barrels of crude oil from the U.S. Strategic Petroleum Reserve announced on September 29. However, it does not account for any additional crude oil or petroleum products on the market as a result of the G7's announcement on October 2.

Saturday, January 23, 2027 • Archbishop Carroll High School, Radnor, PA

 **SAVE THE DATE** 

The 2026 – 2027

Future City Competition Theme

Fire Resilient Future

Dear Friends,

We hope you had a wonderful summer! Now it is time to gear up for another exciting year of the Future City Philadelphia Regional Competition! More than 40 schools across the region are working on their Future City projects and preparing to bring their ideas to life.

 2026–2027 Future City Challenge

Using the Engineering Design Process (EDP) and project management skills, students will develop innovative solutions to a citywide sustainability challenge. This year, students are being challenged to:

 ***Design a city that prevents, protects against, and recovers from urban wildfires.***

And we need YOU to help make this experience possible! There are several ways to get involved:

- Volunteer at the Philadelphia Regional Competition
- Sponsor the competition or support student experiences
- Mentor a Future City team
- Share Future City with a school, educator, engineer, STEM professional, or community partner

Your support gives students an opportunity to strengthen their STEM knowledge, practice teamwork, develop leadership skills, solve real world problems, and imagine themselves as the engineers and city leaders of the future. Please join us and help inspire the next generation of innovators!

Learn more about the Future City Philadelphia Region at the Future City website: www.futurecityphilly.org

Questions or interested in getting involved?

SIGN UP NOW: www.futurecityphilly.org/volunteer/

General questions: Dr. Kym Oglesby, Future City Philadelphia Volunteer Coordinator •
kymoglesby.rmg@gmail.com • 484-501-1886

This year's competition will take place on Saturday, January 23, 2027 at Archbishop Carroll High School, 211 Matson Ford Road, Radnor, PA 19087.

We look forward to another incredible year of STEM, innovation, creativity, and student leadership!
— Future City Philadelphia Volunteer Team

State of Pennsylvania

October is here — the month when we pay admission to walk through a field, pick out a pumpkin or two that are far heavier than they look, and haul them back to the car ourselves. Halfway across the parking lot, that little kink in your back reminds you that “we need a bigger pumpkin” was not sound medical advice. Somewhere, a farmer is watching us do all the heavy lifting and thinking, “This is a pretty good business model.”

Then comes the bale of hay for the front porch. It looks harmless enough until you load it into the car and discover you'll be picking stray straw out of the seats, carpet, and trunk until Christmas. Add in the falling leaves, Halloween costumes, and a golf ball that disappears in the middle of the fairway, and October has plenty of ways to keep us humble.

For energy buyers, the lesson is simple: know what you're picking up before you commit. A contract that looks manageable at first glance can come with unexpected weight — and costs that linger longer than the straw in your back seat.

October 2026 Energy Markets Update

Power Markets — Don't Let Capacity Costs Wear a Disguise

PJM capacity costs remain an important budget consideration. The July auction for the 2028/2029 delivery year cleared at the approved price cap of **\$325 per megawatt-day**, while PJM continues working to address growing electricity demand and resource adequacy challenges.

Questions for your October contract review:

- Are capacity charges included, passed through, or subject to adjustment?
- What assumptions does the quote make about your peak-load contribution?
- Are competing supplier offers using comparable terms?
- How much winter and 2027 price exposure remains open?
- Would a fixed-price, layered, or blended approach better fit your budget?

A contract can dress up as “fixed” for Halloween. Make sure you know which charges are actually wearing the costume.

Natural Gas — A Storage Cushion, Not a Winter Guarantee

Natural gas enters October with a more balanced story than a simple “prices are going up” headline. EIA's October outlook forecasts storage to finish the month approximately **2% above the five-year average**. That provides a cushion heading into heating season, although prolonged cold could push withdrawals above the forecast. EIA also expects production growth to help meet rising LNG exports and domestic demand.

DOC's MONTHLY DOSE

State of Pennsylvania
(continued)

DOC's gas watch list:

- Final storage injections before heating season
- Early cold spells and sustained heating demand
- Production performance during severe weather
- LNG export demand
- The price and availability of winter supply offers

The prescription is not to panic-buy, and it is not to assume comfortable storage makes winter harmless. Review what you have covered, what remains exposed, and what level of uncertainty your budget can tolerate. Think of storage like the Halloween candy bowl: looking well supplied at the beginning of the evening is reassuring. It is not a guarantee once three minivans pull up.

Crude Oil — The Scary Headlines Aren't Just Decorations

Oil continues to face significant supply and transportation uncertainty. In its October 6 outlook, EIA assumes Middle East oil flows remain constrained through the fourth quarter and forecasts Brent crude to average **\$105 per barrel during that quarter**. EIA also highlights tight diesel markets and below-normal East Coast distillate inventories heading into winter. These are forecasts and market conditions, not guarantees of future prices.

Keep these items on the watch list:

- Middle East production and export disruptions
- Strait of Hormuz transit conditions
- Alternative export routes and infrastructure security
- Diesel and heating-oil inventories
- Changes in supply availability and global demand

For businesses buying diesel or heating oil, include those fuels in the budget review rather than focusing only on electricity and natural gas. A plastic skeleton on the lawn is seasonal entertainment. An overlooked fuel expense is considerably less charming.

Weather Update — Sweater Weather Is Not a Purchasing Strategy

EIA's winter outlook assumes a warmer Northeast winter than last year, but it also evaluates colder and warmer scenarios because weather remains a major source of uncertainty. Cold can increase both fuel consumption and prices, particularly when supply is constrained. A seasonal forecast should inform planning — not replace it.

DOC's MONTHLY DOSE

State of Pennsylvania
(continued)

October Purchasing Playbook

Before pumpkin picking turns into Thanksgiving planning, ask:

1. **When do my electricity and natural gas contracts expire?**
2. **How much winter usage is covered, and how much remains exposed?**
3. **Are capacity and other non-energy charges clearly addressed?**
4. **Have I compared supplier offers on equivalent terms?**
5. **Would locking a portion now fit my risk tolerance better than an all-or-nothing decision?**
6. **Does my 2027 budget include reasonable price and usage scenarios?**
7. **Do I understand the contract's adjustment, renewal, and termination provisions?**

Choosing an energy contract should involve more inspection than choosing a pumpkin. The biggest one is not always the best, the cheapest one may need a closer look, and discovering the problem after you get it home is never ideal.

For some clients, budget certainty may be the priority. For others, a layered approach may offer a better balance of protection and flexibility. The goal is a deliberate decision based on your account – not a last-minute scramble through the procurement corn maze.

Market Planning Snapshot – October 2026

DOC's qualitative assessment based on the conditions discussed above; not a guarantee of price direction.

Oil – Elevated / Volatile: Middle East flows, transit constraints, distillate inventories

Gas – Balanced / Winter-Watch: Storage cushion, cold-weather demand, production and LNG exports

Power – Budget-Caution / Capacity-Aware: Capacity treatment, wholesale pricing, winter exposure

DOC'S FINAL DOSE

Pick the pumpkin. Enjoy the leaves. Wear the ridiculous costume. But review your energy exposure before winter arrives.

And if you find my golf ball under the leaves, please return it. It was a perfect drive – according to the only witness who matters.

President

CLARK ENERGY, INC.
Energy Consulting Services

2793 Highland Ave.
Broomall, PA 19008
clarkenergy@comcast.net

Cell (610) 299-1743
Phone (610) 325-9229

Est. in 1993, Clark Energy Inc. is an energy consulting firm that:

- Acts as an Owner's Rep for energy conservation projects.
- Subcontracts to major ESCOs on Performance Contracting projects.
- Performs energy audits and demand response plans for customers.
- Has mentored and trained engineers at two startup companies and one established ESCO.
- Develops innovative sales and marketing initiatives, translating technical innovation into clear unique value propositions.

Jim Clark has served for over 20 years on the board of GPAEE as President, Community Outreach, and the Employment Initiative.

Sponsorship & Advertising

Each month, GPAEE's award-winning Newsletter is sent to over 1,400 energy industry professionals - area engineers, facility & building managers, contractors and vendors. In addition, our monthly Events are attended by up to 100 energy professionals. In turn, your company can reach our professional energy members & audience via several different Corporate Support options:

Newsletter Advertisement	Ad Size	Cost per Issue	Annual Cost
	1/8 Page	\$20	\$100
	1/4 Page	\$50	\$200
	1/2 Page	\$100	\$400
	Full Page	\$200	\$800
Sponsor Monthly Event	Includes Newsletter Announcement		
	Full Page Ad in one Newsletter		
	Corporate Profile in Meeting Announcement		
	Table Top @ sponsoring Event		
	5-10 min. Presentation @ Event		
	Cost = \$300

GPAEE Energy Job Board

1. If you are looking for employment or have a position to fill, check out our Employment Tab on the GPAEE website. It's self-serve and a great place to post and share opportunities.
2. Unemployed members can post a free Energy Position Wanted ad for 3 months in our newsletter which currently reaches over 1,400 people.
3. To post an ad in the newsletter, send a brief description with URL link and contact information to our newsletter editor at newsletter@gpae.org. Ads are free except those solicited by professional employment agencies.
4. Companies with openings are invited to announce them at our monthly meetings.
5. Contact Jim Clark directly for any employment questions @610-299-1743 or jobs@gpae.org.

Various Positions Available

PECO

PECO is hiring for various roles in our region. Review all of the job details and apply today! We're powering a cleaner, brighter future: <https://careers.peco.com/peco/jobs>

Exelon is leading the energy transformation, and we're calling all problem solvers, innovators, community builders and change makers. Work with us to deliver solutions that make our diverse cities and communities stronger, healthier and more resilient.

We're powered by purpose-driven people like you who believe in being inclusive and creative, and value safety, innovation, integrity and community service. We are a Fortune 200 company, 19,000 colleagues strong serving more than 10 million customers at six energy companies -- Atlantic City Electric (ACE), Baltimore Gas and Electric (BGE), Commonwealth Edison (ComEd), Delmarva Power & Light (DPL), PECO Energy Company (PECO), and Potomac Electric Power Company (Pepco).

In our relentless pursuit of excellence, we elevate diverse voices, fresh perspectives and bold thinking. And since we know transforming the future of energy is hard work, we provide competitive compensation, incentives, excellent benefits and the opportunity to build a rewarding career.

Technologist and Sustainability Advocate seeking Energy Efficiency Role

Lori Imbesi

Technologist and sustainability advocate looking to bring my skills into the energy efficiency field. I currently work as a software developer – testing applications, tracing data flows, and fixing issues, but I'm interested in transitioning to an implementation, data management, or systems analyst role – ideally remote – at an energy efficiency company, utility, or program administrator, with room to grow into deeper energy-sector expertise.

In addition to technical skills, I bring a long-held commitment to sustainability and regenerative living. I've been a member of Transition Town Greater Media since its inception 17 years ago. TTGM is a local sustainability and community-resilience organization. One of its many initiatives, Solarize Media, brought new residential solar energy installations to Media (over 350kW) and catalyzed the Solarize Philly and Solarize Delco initiatives.

Happy to discuss how my background could translate to your team's needs.

Energy Engineer seeking Energy/Environmental Engineering Role

Quentin Lawson-Parchment

I'm a 2023 Penn State graduate with a BS in Energy Engineering accompanied with a Minor in Environmental Engineering, looking to work in the Energy / Environmental Engineering field. Currently I am the Office Engineer for the Delaware River Port Authority (DRPA)'s Commodore Barry Bridge Phase III Rehabilitation Project. I am seeking a position in Energy Engineering Design / Construction Management / Project Management / Project Engineering. Previously, I have worked for Constellation, Waga Energy, and the World Food Programme. I am currently the youngest sitting board member of Penn State University's Earth & Mineral Science's Department's Alumni board in PSU's history. I am also a two-time published author within AEE's International Journal of Strategic Energy & Environmental Planning (Vol 6, Issue 1) and International Journal of Energy Management (Vol 5, Issue 5).

THE ENERGY TO SUCCEED

GO WITH THE PROVEN ENERGY SOLUTION:
CLEANER, GREENER NATURAL GAS.

More than 25,000 businesses in Philadelphia use natural gas from PGW, so they can focus on their operations, not on their energy bills.

- Natural gas is affordable and reliable.
- Our experts assist you in finding a solution sized for your business.
- PGW can help you take advantage of great rebates and incentives.

And PGW is an industry leader in Combined Heat & Power technology – so you can cut costs AND improve resiliency.

New & Corporate Member Spotlight

THANK YOU FOR YOUR SUPPORT

Do you have a member in your organization who you would like to highlight?

Perhaps they are innovative, energetic and the sort of character that our membership would be interested in hearing about. If so, please send an email to newsletter@gpae.org with a brief description of why this person is special and should be introduced to the Greater Philadelphia community.

This opportunity is open to all individual and corporate members.

GPAEE
GREATER PHILADELPHIA CHAPTER
ASSOCIATION OF ENERGY ENGINEERS

Who we are?

Founded in 1982, we are dedicated to helping our members and community implement energy efficient technologies to reduce expenses, improve the environment, and bolster our economy.

Membership Benefits

There are many exclusive benefits to becoming a member of GPAEE. Among them are networking opportunities, monthly newsletters, discounted fees for meetings, professional training opportunities, GPAEE Energy Job Board, and access to past meeting presentations. Furthermore, your membership fees are used in the Philadelphia Area for scholarships, charitable donations, etc.

Interested in joining GPAEE? It's simple!

We invite you to join our local chapter to network with your industry peers, discuss projects, develop leads, encourage energy efficient design, and discover new energy related strategies.

If you would like to join the GPAEE and receive monthly e-newsletters, receive information and announcements for upcoming events and discounts on GPAEE events - sign up today.

Individual Members

~~\$50~~ Annual Membership Cost

- To join visit gpaee.org
- Go to the Membership tab
- Fill out the Membership Application
- Pay by either check or credit card

That's it!

You will then be able to access and login to our website to register for events and view the Member Area of the GPAEE website which includes classifieds, your account info, our member directory, and more.

Corporate Members

~~\$200~~ Annual Membership Cost

Includes 5 annual memberships, additional members, ~~\$30~~ per person

- To become a Corporate Member visit gpaee.org
- Go to the Corporate Membership tab
- Fill out the Corporate Membership Application
- Pay by either check or credit card

That's it!

You will then be listed on our website as a Corporate Member and have members access to register for events, classifieds, our member directory and more.

For more information visit our website www.gpaee.org
